

# PAF® Multiple Residence

If you're selling online, it's vital that you can identify individual dwellings and businesses within multiple occupancy buildings that share a front door.

Many properties are subdivided into flats that share a single letterbox.

**Multiple Residence** helps identify customers that are buying goods and services online, and enables letters and parcels to be delivered correctly.

Over **2000** records are added to **Multiple Residence** each month.

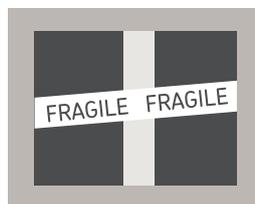

More mail gets to the right household first time with **Multiple Residence**, keeping customers happy.

**Multiple Residence** reduces the chances of mail being lost, so less time is spent managing complaints.

**MISSING**

**Multiple Residence** holds more than **750,000** records

**Multiple Residence** is easy to integrate into your existing systems.

To help identify the individual households and businesses behind every shared front door, contact us:
